WP 1: Innovation Opportunities for Circular Economy — 67% complete

Developing a framework to understand the companies/industries' performance for circular economy — Completed

Identifying gaps and drivers at targeted Industries/Companies to comply with the norms and consumers' preferences — 90%

Assessing the innovation capacities of the industries/sectors — 10%

Milestone 1 — 100% complete

WP2: Development of a networked portfolio — 10% complete

Identifying existing core services for plastics challenges within the network of partners

Design of Institutional Portfolios

Promoting cross-peer collaboration and mentoring

WP3: Multi-actor collaborations for just and safe plastics circular economy — 0% complete

Reuse action clues in Argentina, Chile and Colombia

Engaging local stakeholders

Assessment of local reuse systems and benchmarking with impactful reuse practices

Search Conference

Implementation of collaborative initiatives

WP3: Pilot projects implementation — 0% complete

Pedagogical Integration of Industry at the University

Pilots implementation

Cross evaluation of pilot projects between Latin American Universities

Institutional Recommendations

WP5: Communication and Dissemination — 17% complete

Definition of a dissemination strategy and its implementation.

Dissemination Toolbox and Training

Project Website Launching and Monitoring

Establishing an Open Digital Repository

Final Conference

WP6: Project management and Quality assurance — 17% complete

Partnership agreement management with the consortium

Financial management guidelines, monitoring and reports

Project Management guidelines, monitoring and reports

Establishment of quality guidelines and an external committee for monitoring the advancement of the project

Organization of the Kick-off meeting at Nancy
